

The Raider Learning Community Program (RLC) offer students an opportunity to experience classes at MTSU in a whole new way. The RLC program helps to create a small college atmosphere within the large university environment. RLC students belong to small groups and enroll as a group together in courses available to that community. As an RLC participant, you will find the program gives you a built-in group of friends and academic colleagues, providing a real enhancement to your studies and entire college experience.
