Overview

The Career Development Center is charged with surveying each of the three graduating classes annually. This is the third graduating class surveyed using the new 1st Destination Survey (1DS). Not only was the name changed and the survey rebranded, but the questions were also changed to identify graduates’ primary plan upon graduation. This will allow for better analysis of the data. Getting an adequate response rate continues to be a challenge. The response rate is so low that only a few majors were included in the salary analysis.

Survey Administration

Three email surveys were sent using Emma Email Marketing. The first survey was delayed due to staffing issues. All three surveys were sent to students on the Registrar’s official list of May graduates. Surveys were sent to the graduate’s primary and secondary email addresses. The survey was listed on the 1DS website on-time so it was active for six months instead of the usual three.

In August 2013, the Career Development Center was charged with developing new procedures to administer the survey and develop the report in a timely manner using existing resources. The changes affect the August 2012 report and all subsequent reports. The changes include:

1. Only data from the 1DS will be used for reporting employment and graduate/professional school outcomes.
2. Survey results will no longer be entered into Lightning JobSource, but will reside in each survey’s Excel spreadsheet.
3. A report will be produced for each graduating class instead of waiting until the end of the year to do all three together.
4. Analysis of the data will be based on students’ self-reporting of data and not verified in Banner (i.e. verifying graduation date and correct listing of major).

Response Rate

A total of 286 majors responded to the survey (baccalaureate and graduate). 247 out of 1,958 bachelor degree majors responded and 39 of the 511 graduate degree majors responded. Combined, this represents an 11.6% response rate. (Note: this is a count of majors; actual number of students is slightly less due to some students having dual majors).

This chart represents the primary plans for the upcoming year for bachelor degree recipients.

At the conclusion of the survey period, 21.7% were still seeking employment. Another 0.4% had yet to decide on a plan; and 2.9% selected the Other category.

The remaining 75.0% of the graduating class had plans implemented.

The chart to the right illustrates how bachelor recipients reporting a new position secured that position. The top three sources are Personal Networking, Employer Website & Previous Intern of Employer.

The charts below show that 80.7% indicated their new position was related to their major and 92.8% of the positions were full-time.
