

Advisor Assignment Policy for the Department of Chemistry and PreProfessional Health Science Students

All students desiring to major in Chemistry or a PreProfessional Health Science Program are assigned advisors through the Clara Todd PreProfessional Health Science Advising Resource Center, located in the Davis Science Building, Room 241.

Students will first meet with the Coordinator of PreProfessional Health Science Advising, Jennifer Braswell. Ms. Braswell will have an initial advising session, giving information about the requested major/program and will also assign appropriate faculty advisors to students. PreProfessional Health Science Advisors include faculty from the departments of Chemistry, Biology, and Physics. Specific Chemistry majors will be assigned to a designated Chemistry faculty member.

All preprofessional health science students are required to see their assigned advisors every semester before registration can occur.
