a visual COLLAGE...

This month the COLLAGE staff has created a visual dialogue instead of the normal verbal one. Some things you might want to cut out, fold up and fly; some things you might want to color. With some you'll have to read the title in the contents before they make sense.

The images of a variety of MTSU students reflect their own unique places in the history of man, and at no other time could these images have been made. In effect, this issue is a visual collage of ourselves. Follow the arrow around the edge of the paper and meet our world, as of December, 1969, that is.
