International Symposium on Aviation Psychology

(5/05/2011)
Thursday, May 5, 2011
Discovery

Symposium 1330 – 1455

High-Fidelity Simulation and Training to Improve Coordination between Aerospace Specializations
HIGH-FIDELITY SIMULATION AND TRAINING TO IMPROVE COORDINATION BETWEEN AEROSPACE SPECIALIZATIONS

Paul A. Craig

Richard G. Moffett III, Glenn E. Littlepage, Michael B. Hein
Andrea M. Georgiou, Gerald L. Hill, Jennifer A. Henslee
Paul R. Carlson, Nora A. Cole, Joseph H. Cooper
Durant C. Bridges III, Justice Amankwah, Donald J. Tipton Jr., Alan Waid

Middle Tennessee State University
Murfreesboro, TN, USA
Using a Measure of Occupational Stereotype to Assess Ingroup-outgroup Bias among Aerospace Specializations

Richard G. Moffett III
Michael B. Hein
Glenn L. Littlepage
Middle Tennessee State University
Murfreesboro, TN, USA

This research was supported in part by a contract (NNO30A0120) from NASA awarded to the Middle Tennessee State University Center for Research on Aviation Training.
Important Concepts

- Interpositional Knowledge
  - Understanding of Tasks & Roles of Others
- Shared Mental Models
  - Common View of Task or Teamwork Requirements
- Degree of Mental Model Accuracy
- The concepts resound in the emphasis of Crew Resource Management (CRM)
frequency and duration
