Department of Biology

George Murphy, Chair
Davis Science Building 128

The Department of Biology offers the Master of Science as well as a minor at the graduate level. Normally, the required test score for admission is a satisfactory Graduate Record Examination score (minimum expected score of 800 verbal and quantitative). The department also offers courses in the Master of Science in Professional Science degree. Complete information on the Professional Science program and its concentrations in Biotechnology, Biostatistics, and Health Care Informatics can be found on page 163.

Requirements for the Master of Science

Candidate must
1. have an undergraduate minor in biology or its equivalent at time of admission.
2. complete a minimum of 30 semester hours including a thesis of 3 semester hours with no more than 30 percent of the total degree hours dually listed as undergraduate/graduate hours.
3. complete 6 semester hours of a foreign language or pass a language examination or complete one year of approved research tools in addition to the 30 hours.
4. pursue a major of at least 16 semester hours which includes
   BIO 6620 Biological Research
   BIO 6640 Thesis Research
   BIO 6650 Seminar
   BIO 6660 Seminar

   Remaining courses will include approved courses in biology, chemistry, mathematics, physics, or certain other related disciplines. A minor is optional but if elected must include a minimum of 12 semester hours.
5. file a degree plan with the Graduate Office prior to the completion of 21 credit hours.
6. successfully complete a written comprehensive examination (may be taken no more than twice).

Courses in Biology [BIOL]

5010 Embryology. Four credits. Prerequisites: BIOL 1110/1111 and 1120/1121. Corequisite: BIOL 5011. Early development of the frog, chick, pig, and human. Living material, whole mounts, and serial sections used for the study of cleavage, germ layer formation, histogenesis, and organogenesis. Three lectures and one three-hour laboratory.

5030 Nonflowering Plants. Four credits. Prerequisites: BIOL 1110/1111 and 1120/1121. Structure, physiology, methods of reproduction, and classification of the algae, fungi, liverworts, mosses, and ferns. Six hours lecture/laboratory.

5050 Parasitology. Three credits. Prerequisites: BIOL 1110/1111 and 1120/1121. Corequisite: BIOL 5051. Life histories, host-parasite relationships, and control measures of the more common parasites of humans and domesticated animals. Two lectures and one three-hour laboratory.

5100 History and Philosophy of Biology. Three credits. Prerequisites: BIOL 1110/1111 and 1120/1121. Development of biology; the philosophy, ideas, and contributions of outstanding biologists. Three lectures.

5120 Flowering Plants. Four credits. Prerequisites: BIOL 1110/1111 and 1120/1121. Structure and classification of seed plants and a survey of local flora. Six hours lecture/laboratory.

5130 Histology. Four credits. Prerequisites: BIOL 3250/3251; CHEM 1110/1111 and 1120/1121. Corequisite: BIOL 5131. Microscopic anatomy of vertebrate cells, tissues, and organs. Three lectures and one three-hour laboratory.

5140 Invertebrate Zoology. Four credits. Prerequisites: BIOL 1110/1111 and 1120/1121. Corequisite: BIOL 5141. Structure, functions, life histories, and economic importance of the invertebrate phyla. Laboratory work comprises detailed studies of representative specimens. Three lectures and one three-hour laboratory.

5170 Endocrinology. Three credits. Prerequisites: BIOL 3250/3251, 4110/4111, or 2020/2021; CHEM 2030/2031 or 3010/3011. Structure, function, and integrative mechanisms of vertebrate endocrine organs, with additional attention to invertebrate hormones. Three lectures.
5180 **Vertebrate Zoology.** Four credits. Prerequisites: BIOL 1110/1111 and 1120/1121. Corequisite: BIOL 5181. Structure, life history, and classification of fish, amphibians, reptiles, birds, and mammals. Local representatives emphasized. Three lectures and one three-hour laboratory.

5181 **Vertebrate Zoology Lab.** Zero credits. Corequisite: BIOL 5180.

5220 **Ichthyology.** Four credits. Prerequisites: BIOL 1110/1111 and 1120/1121. Corequisite: BIOL 5221. The morphology, physiology, taxonomy, and ecology of fishes. Three lectures and one three-hour laboratory.

5221 **Ichthyology Lab.** Zero credits. Corequisite: BIOL 5220.

5240 **General Ecology.** Four credits. Prerequisites: BIOL 1110/1111 and 1120/1121; CHEM 1110/1111 or consent of instructor. Corequisite: BIOL 5241. Basic concepts of the ecosystem and community, aquatic and terrestrial habitats, and population ecology; complemented by field and laboratory activities. Three lectures and one three-hour laboratory per week.

5241 **General Ecology Lab.** Zero credits. Corequisite: BIOL 5240.

5250 **Limnology.** Four credits. Prerequisites: BIOL 1110/1111, 1120/1121; CHEM 1110/1111. Corequisite: BIOL 5251. Biological, chemical, and physical aspects of lakes and streams. Not open to students who have had Aquatic Ecology. Three lectures and one three-hour laboratory.

5251 **Limnology Lab.** Zero credits. Corequisite: BIOL 5250.

5260 **Nature Study.** Three credits. Prerequisites: BIOL 1110/1111 and 1120/1121. Identification of local plants and animals and a consideration of the ecological principles governing them. Four hours lecture/laboratory.

5320 **Seminar: Advancements in Biology.** Two credits. A broad overview of biological principles and recent research developments. Two lectures.

5330- **Biome Analysis.** One to four credits. Prerequisite: Permission of department. An intensive classroom and on-site study of a specific biome with special emphasis on data collection and analysis. Consult department head for specific credits and costs.

5331 **Biome Analysis - Cedar Glade**

5332 **Biome Analysis - Marine**

5333 **Biome Analysis - Desert**

5390 **Ethology.** Four credits. Prerequisite: BIOL 1110/1111. Corequisite: BIOL 5391. Innate and learned animal behavior in primitive and advanced animals including behavior associated with space, reproduction, and food getting. Three lectures and one three-hour laboratory.

5391 **Ethology Lab.** Zero credits. Corequisite: BIOL 5390.

5460 **Human Genetics.** Three credits. Prerequisite: BIOL 3250/3251. Corequisite: BIOL 5461. Application of the fundamental laws of inheritance to humans. Two lectures and one two-hour laboratory.

5461 **Human Genetics Lab.** Zero credits. Corequisite: BIOL 5460.

5500 **Plant Physiology.** Four credits. Prerequisites: BIOL 3250/3251; CHEM 2030/2031 or 3010/3011. Plant growth; development and metabolism at the cellular and whole plant levels. Six hours lecture/laboratory.

5510 **Food/Industrial Microbiology.** Four credits. Prerequisite: BIOL 2230/2231. The interaction between microorganisms and food and industrial processes of importance to humans. Six hours lecture/laboratory.

5520 **Plant Anatomy.** Four credits. Prerequisite: BIOL 1120/1121. Plant cells, tissues, and organs. Emphasis on the survival value of the plant’s various structural features. Six hours lecture/laboratory.

5540 **Topics in Environmental Education.** One to four credits. Prerequisite: Junior standing or above. An intensive classroom and field study of natural science and resources in Tennessee. Special emphasis on data collection, analysis, and problem solving. Target groups are graduate students and upper-division undergraduates in the areas of biology and education. Consult the department chair for specific credits and costs. This course will not apply to the biology major or minor.

5550 **Biotechnology.** Three credits. Prerequisites: BIOL 2230/2231 and senior/graduate level. Instruction in both theory and application of current research methodologies in biology and molecular biology. Topics included immunology, polymerase chain reaction, restriction enzyme analysis, and electrophoresis. Five hours lecture/laboratory.

5560 **Neurobiology.** Four credits. Prerequisites: BIOL 1110/1111 and 1120/1121. Corequisite: BIOL 5561. Introduces comparative neurobiology. Topics include the basic structure and function of the nerve cell and organization of nervous systems of representative species of invertebrate and vertebrate animals. Three hours lecture and one three-hour laboratory.

5561 **Neurobiology Lab.** Zero credits. Corequisite: BIOL 5560.

5570 **Principles of Toxicology.** Three credits. Prerequisites: BIOL 1110/1111, 1120/1121; CHEM 1110/1111, 1120/1121, 3010/3011. Corequisite: BIOL 5571. Adverse effects of chemical agents on living organisms; current toxicological techniques in laboratory portion of course. Two hours lecture and one three-hour laboratory.

5571 **Principles of Toxicology Lab.** Zero credits. Corequisite: BIOL 5570.

5580 **Marine Biology.** Four credits. Prerequisites: BIOL 1110/1111, 1120/1121; CHEM 1110/1111, 1120/1121. Corequisite: BIOL 5581. Biological, chemical, and physical characteristics of major marine environments and their associated flora and fauna. Three lectures and one three-hour laboratory.

5581 **Marine Biology Lab.** Zero credits. Corequisite: BIOL 5580.

6060 **Advanced Dendrology.** Three credits. Prerequisite: BIOL 1120/1121. Woody plants with special emphasis on classification, identification, and literature of important timber trees of North America. Five hours lecture/laboratory.

6070 **Plants and Man.** Three credits. Prerequisite: BIOL 1120/1121. Human dependence on plants emphasized. Topics include origin of agriculture, fruits and nuts, grains and legumes, vegetables, spices and herbs, oils and waxes, medicinal plants, psychoactive plants, beverages, fibers and dyestuffs, tannins, wood and ornamental plants. Three lectures.

6080 **Advanced Mycology.** Four credits. Prerequisites: Graduate standing plus BIOL 1120/1121. Corequisite: BIOL 6081. Fungi, with emphasis on taxonomy, morphology, culture, and importance to humans. Three lectures and one three-hour laboratory.

6120 Aquatic Ecology. Three credits. Physical, chemical, and biotic conditions of freshwater lakes and streams and of population structure and dynamics in these environments. Not open to students who have had Limnology. Five hours lecture/laboratory.

6200 Speciation. Three credits. Prerequisite: BIOL 3250/3251. Mutation, natural selection, adaptation, isolating mechanisms, genetic drift, hybridization, ploidy in the process of species formation, and a history of the development and ideas of evolution. Two lectures.

6210 Protozoology. Three credits. Corequisite: BIOL 6211. Morphology, physiology, reproduction, ecology, taxonomy, and life cycles of the protozoa. Two lectures and one three-hour laboratory.

6220 Herpetology. Three credits. Prerequisites: BIOL 4240/4241 or 5240/5241. Corequisite: BIOL 6221. Morphology, natural history, and identification of amphibians and reptiles. Local representatives emphasized. Two lectures and one three-hour laboratory.

6270 Cell Metabolism and Human Disease. Three credits. Prerequisites: BIOL 4110/4111 or 6330/6331; CHEM 3010/3011, 3530/3531. Metabolic pathways of mammalian cells and the diseases that result from genetic defects that disrupt their normal function.

6290 Advanced Scanning Electron Microscopy. Four credits. Prerequisite: Permission of instructor. Application of scanning electron microscopy to study materials with emphasis on theory of scanning electron microscopy and preparation of biological specimens for microscopy. Seven hours lecture/laboratory.

6330 Principles of Physiology. Four credits. Prerequisites: BIOL 3250/3251; CHEM 2030/2031 or 3010/3011. Corequisite: BIOL 6331. Physical and chemical properties of protoplasm, cells, and organisms and their relationships to life processes. Three lectures and one three-hour laboratory.

6350 Biostatistical Analysis. Four credits. Prerequisite: BIOL 3250/3251. Corequisite: BIOL 6351. Intermediate-level introduction to biostatistical procedures used in research. Three lectures and one three-hour laboratory.

6380 Experimental Immunology. Four credits. Prerequisite: BIOL 2230/2231. Corequisite: BIOL 6381. Mechanisms of immunity including the more recent developments in immunology. Three lectures and one two-hour laboratory.

6381 Experimental Immunology Lab. Zero credits. Corequisite: BIOL 6380.

6390 Advanced Cell and Molecular Biology. Four credits. Prerequisites: BIOL 2230/2231, 3250/3251; CHEM 2030/2031 or 3010/3011. Corequisite: BIOL 6391. Molecular biology of the cell with emphasis on current experimental techniques. Three lectures and one three-hour laboratory.

6400 Medicinal Plants. Three credits. Prerequisite: BIOL 1120/1121. Plants affecting human health, including poisonous, psychoactive, and remedial plants. Ethnobotanical and modern medicinal uses considered. Three lectures.

6410 Advanced Transmitting Electron Microscopy. Four credits. Prerequisite: Permission of instructor. Ultrastructure of the cell using basic and specialized techniques. Seven hours lecture/laboratory.

6430 Clinical and Pathogenic Microbiology. Four credits. Prerequisite: BIOL 2230/2231. Comprehensive coverage of the most recent discoveries and techniques used for the identification of pathogenic organisms and their relationships to disease processes. Six hours lecture/laboratory.

6440 Advanced Virology. Four credits. Prerequisites: BIOL 2230/2231; CHEM 1110/1111 and 1120/1121. Emphasizes the main virus families and their biochemical composition. Experimental ap-
proaches and techniques will be developed in order to identify and manipulate viruses. Six hours lecture/laboratory.

6450 Advancements in Molecular Genetics. Four credits. Prerequisites: BIOL 2230/2231; CHEM 1110/1111 and 1120/1121. Recent advancements in microbial genetics and gene manipulation with emphasis on applications of molecular genetics, including gene regulation and recombinant DNA technology. Six hours lecture/laboratory.

6460 Conservation Biology. Four credits. Prerequisite: BIOL 4240/4241 or 5240/5241. Measuring biodiversity: species, ecosystem, and genetic diversity. Topics include conservation ethics, extinctions, habitat degradation, exotic species, and management of populations and ecosystems. Six hours lecture/laboratory.

6500 Special Problems in Biology. Four credits. Prerequisite: Permission of department. Plan, implement, and interpret a research problem in some area of biology. Available topics limited to areas of graduate faculty interest and expertise.

6590 Environmental Toxicology. Four credits. Prerequisites: BIOL 1110/1111, 1120/1121; CHEM 1110/1111, 1120/1121, and 3010/3011. Ecological effects of chemicals in the environment and techniques currently utilized to assess these effects. Current environmental assessment techniques, including biomonitoring, will be covered in the laboratory. Six hours lecture/laboratory.

6620 Biological Research. Three credits. Prerequisite: Permission of department. Selection of a research problem, review of pertinent literature, and execution of the research.

6640 Thesis Research. One to six credits. Prerequisites or corequisites: BIOL 6620 and permission of department. Completion of the research problem begun in BIOL 6620; preparation of the thesis. Once enrolled, student should register for at least one credit hour of master's research each semester until completion. Minimum of three credits required for M.S. degree. S/U grading.

6650 Seminar. One credit. Discussion and critical evaluation of the primary scientific literature. Responsible conduct of research topics including data management, publication practices, peer review, and collaborative science emphasized. One two-hour session.

6660 Seminar. Two credits. Development of written and oral communication skills relevant to obtaining research funding and presenting research results. Responsible conduct of research topics including mentor/trainee relationships, human subjects, animal research, research misconduct, and conflicts of interest emphasized. Two one-hour sessions.

6700 Plant-Animal Interactions. Three credits. Prerequisite: BIOL 1110/1111, 1120/1121. Corequisite: BIOL 6701. Evolutionary and ecological perspectives on how plants attract and repel symbionts and how those symbionts influence plant fitness. Topics include angiosperm evolution, the coevolution of plants with pollinators, herbivores, mycorrhizae, and N-fixing bacteria, and how plant secondary metabolites facilitate or mitigate these interactions. Two hours lecture and three hours lab.

6710 Biostatistical Analysis II. Three credits. Prerequisite: BIOL 4350 or 6350. Advanced-level applied, multivariate biological statistics. Three lectures per week.

6720 Advanced Animal Development. Four credits. Prerequisites: BIOL 3250/3251; BIOL 4210/4211 or 6390/6391 recommended. Corequisite: BIOL 6721. Processes and underlying molecular mechanisms by which a single fertilized egg develops into an adult organism. Focuses on vertebrate development, including insights gained from other model organisms. Three hours lecture and two hours lab.

6730 Advanced Microbial Physiology and Biochemistry. Four credits. Prerequisites: BIOL 2230/2231; CHEM 1110/1111, 1120/1121, and 2030/2031 or 3010/3011 or consent of instructor. Survey of the physiology and biochemistry of prokaryotic and eukaryotic microorganisms. Six hours lecture/laboratory.

6740 Brain Development and Learning Disabilities. One credit. Prerequisite: Permission of department. Biology and psychology underlying dyslexia and other common learning disabilities encountered in the school setting. Addresses practical classroom applications utilizing this background information. Five three-hour class meetings.

6750 Advanced Plant Biotechnology. Four credits. Prerequisites: BIOL 1110/1111 and 1120/1121 and CSCI 1170 or consent of instructor. Explores the emerging field of bioinformatics which involves the application of computer science to biological questions. Bioinformatics specifically applies to the computational aspects of data gathering, processing, storage, analysis, and visualization methods for use in revising and testing biological hypotheses. Students should have a strong background in either computer science or biology, be willing to learn about the other field in an accelerated fashion, and be willing to work cooperatively as part of an interdisciplinary team. Four hours of lecture/problem solving per week.

6760 Bioinformatics. Four credits. Prerequisites: BIOL 1110/1111 and 1120/1121 and CSCI 1170 or consent of instructor. Explores the emerging field of bioinformatics which involves the application of computer science to biological questions. Bioinformatics specifically applies to the computational aspects of data gathering, processing, storage, analysis, and visualization methods for use in revising and testing biological hypotheses. Students should have a strong background in either computer science or biology, be willing to learn about the other field in an accelerated fashion, and be willing to work cooperatively as part of an interdisciplinary team. Four hours of lecture/problem solving per week.

6770 Issues in Biotechnology. Two credits. Prerequisite: BIOL 4550/4551, 5550/5551, or 4750/6750. Explores current and emerging issues in biotechnology. Students will be asked to solve problems drawn from biotechnology industry. Seminars, field trips, and case study work.

6999 Comprehensive Examination and Preparation. One credit. Open only to students who are not enrolled in any other graduate course and who will take the master's comprehensive examination during the term. The student must contact the graduate advisor during the first two weeks of the term for specifics regarding the details of this comprehensive examination preparatory course. Credit may not be applied to degree requirements.

Field Station Affiliation

MTSU is an affiliate of the Gulf Coast (Miss.) Research Laboratory. Certain courses in marine biology may be taken for graduate credit and transferred to MTSU. See department head for list of courses.
