4a. Scope: Work to be accomplished

This project will install fans for alumni Memorial Gym. These fans efficiently distribute conditioned air from ceiling to floor and wall to wall. By increasing air velocity, Big Ass Fans distribute conditioned air and create a cooling effect throughout the space, allowing a user to raise a thermostat set point. Each degree set point is raised reduces HVAC related energy by 2-3%; for example, by raising the thermostat from 74 F to 81F, one could expect to save 10% to 20% on annual cooling.

4b. Scope: Benefit Statement

If this project is approved it will increase the comfort level in the gym. By distributing the air in the room more efficiently.
