## MTSU Clean Energy Initiative Project Funding Request

There are five (5) sections of the request to complete before submitting. See <http://www.mtsu.edu/~sga/cleanenergy.shtml> for funding guidelines. Save completed form and email to [cee@mtsu.edu](mailto:cee@mtsu.edu) or mail to MTSU Box 57.

1. General Information	
Name of Person Submitting Request Brandon Lewis	
Department/Office Student Government Association, SEA	Phone # (Office)
MTSU Box # N/A	Phone # (Cell) 615-938-0953
E-mail bal3f@mtmail.mtsu.edu	Submittal Date 2/18/2016

2. Project Categories (Select One)	
Select the category that best describes the project.	
<input type="checkbox"/> Energy Conservation/Efficiency	<input checked="" type="checkbox"/> Sustainable Design
<input type="checkbox"/> Alternative Fuels	<input type="checkbox"/> Other
<input type="checkbox"/> Renewable Energy	

3. Project Information
<p>a. Please provide a brief descriptive title for the project.</p> <p>b. The project cost estimate is the expected cost of the project to be considered by the committee for approval, which may differ from the total project cost in the case of matching funding opportunities. <b>Any funding request is a 'not-to-exceed' amount. Any proposed expenditure above the requested amount will require a resubmission.</b></p> <p>c. List the source of project cost estimates.</p> <p>d. Provide a brief explanation in response to question regarding previous funding.</p>
3a. Project Title SGA Resolution 5-16-S: BigBelly Solar Compactor Program Phase 3
3b. Project Cost Estimate \$5294
3c. Source of Estimate BigBelly Solar, inc.
3d. If previous funding from this source was awarded, explain how this request differs?
<small>This request is an extension of the pilot and second-phase program; requesting 1 additional single-unit BigBelly units with waste compacting capabilities.</small>

#### 4. Project Description

(Completed in as much detail as possible.)

- a. The scope of the work to be accomplished is a detailed description of project activities.
- b. The benefit statement describes the advantages of the project as relates to the selected project category.
- c. The location of the project includes the name of the building, department, and/or specific location of where the project will be conducted on campus.
- d. List any departments you anticipate to be involved. Were any departments consulted in preparation of this request? Who? A listing may be attached to this form when submitted.
- e. Provide specific information on anticipated student involvement or benefit.
- f. Provide information for anticipated future operating and/or maintenance requirements occurring as a result of the proposed project.
- g. Provide any additional comments or information that may be pertinent to approval of the project funding request.

##### 4a. Scope: Work to be accomplished

It would have to be decided on where the compactors will be placed to be most beneficial. The shipping and installation is included in the price estimate, as well as insurance for the compactors in case something were to go wrong. After the Compactors are installed, the bins would have to be seldom emptied out by Custodial Services.

Pricing breakdown:

Single-Station Big Belly Compactor= \$3095

Installation Costs= \$200

Lifecycle Software= \$999

Misc Supplies( Trash Bags, Repair, etc)=\$1000

Total= \$5,294

##### 4b. Scope: Benefit Statement

This Project would benefit the MTSU community because it is a very visible environmentally friendly solution to a problem on MTSU's campus, trash overflow. If we were to put these compactors in areas of high waste traffic, it would not only help beautify campus, but relieve pressure off of the shoulders of custodial services because they would not have to do trash pick-up as often. Since the waste portion of the units are compactors, it would also decrease the volume of waste going into our landfills.

<b>4. Project Description (continued)</b>
<p>4c. Location of Project (Building, etc.)</p> <p>The compactor will be located in an area of high waste traffic on campus(Science Building, Mass Comm.)</p>
<p>4d. Participants and Roles</p> <p>Custodial services will be in charge of pick-up of the landfill waste.</p>
<p>4e. Student participation and/or student benefit</p> <p>Students will get the impression that their campus is environmentally conscious and modern. These compactors are far more aesthetic than the current trash receptacles.</p>
<p>4f. Future Operating and/or Maintenance Requirements</p> <p>The compactors have technology installed in them that detail when it is reaching capacity, and there is smart phone software that comes with the compactors that can relay this information to Custodial services. This software also notifies custodial services on when the compactors are in need of repair, what needs to be repaired, and how to repair it.</p>
<p>4g. Additional Comments or Information Pertinent to the Proposed Project</p> <p>This Project is a continuation of a very successful pilot and second phase program and will provide a massive boost towards the already positive public appeal to these units.</p>

### 5. Project Performance Information

Provide information if applicable.

- a. Provide information on estimated annual energy savings stated in units such as kW, kWh, Btu, gallons, etc.
- b. Provide information on estimated annual energy cost savings in monetary terms.
- c. Provide information on any annual operating or other cost savings in monetary terms. Be specific.
- d. Provide information about any matching or supplementary funding opportunities that are available. Identify all sources and explain.

5a. Estimated Annual Energy Savings (Estimated in kW, kWh, Btu, etc.)

Significantly frequent pick-ups, therefore less fuel costs.

5b. Annual Energy COST Savings (\$)

N/A

5c. Annual Operating or Other Cost Savings. Specify. (\$)

Less dumping in the landfill, meaning lower Landfill fees for the University. Less operational costs for custodial services, since the trash pick-up will be less frequent.

5d. Matching or Supplementary Funding (Identify and Explain)

N/A
