<input checked="" type="checkbox"/>	Energy Conservation/Efficiency
<input type="checkbox"/>	Alternative Fuels
<input type="checkbox"/>	Renewable Energy
<input type="checkbox"/>	Sustainable Design
<input type="checkbox"/>	Other

3. Project Information
<p>a. Please provide a brief descriptive title for the project.</p> <p>b. The project cost estimate is the expected cost of the project to be considered by the committee for approval, which may differ from the total project cost in the case of matching funding opportunities. <b>Any funding request is a 'not-to-exceed' amount. Any proposed expenditure above the requested amount will require a resubmission.</b></p> <p>c. List the source of project cost estimates.</p> <p>d. Provide a brief explanation in response to question regarding previous funding.</p>
3a. Project Title : Study for steam trap replacement
3b. Project Cost Estimate : \$15,000
3c. Source of Estimate : Dillingham and Smith
3d. If previous funding from this source was awarded, explain how this request differs? N/A

**4. Project Description**

(Completed in as much detail as possible.)

- a. The scope of the work to be accomplished is a detailed description of project activities.
- b. The benefit statement describes the advantages of the project as relates to the selected project category.
- c. The location of the project includes the name of the building, department, and/or specific location of where the project will be conducted on campus.
- d. List any departments you anticipate to be involved. Were any departments consulted in preparation of this request? Who? A listing may be attached to this form when submitted.
- e. Provide specific information on anticipated student involvement or benefit.
- f. Provide information for anticipated future operating and/or maintenance requirements occurring as a result of the proposed project.
- g. Provide any additional comments or information that may be pertinent to approval of the project funding request.

**4a. Scope: Work to be accomplished**

A comprehensive assessment of steam traps on campus. This study will evaluate the working conditions of steam traps on campus. The loss of steam thru failed traps is a huge energy loss in our campus steam system.

**4b. Scope: Benefit Statement**

A study of the existing traps will help determine a plan of action for replacement of the traps over the next few years. Trap replacement would increase steam efficiency and condensate return thru the system. Increased steam flow will improve overall steam and coil efficiency.
