3. Project Information

- a. Please provide a brief descriptive title for the project.
- b. The project cost estimate is the expected cost of the project to be considered by the committee for approval, which may differ from the total project cost in the case of matching funding opportunities. Any funding request is a 'not-to-exceed' amount. Any proposed expenditure above the requested amount will require a resubmission.
- c. List the source of project cost estimates.
- d. Provide a brief explanation in response to question regarding previous funding.

3a. Project Title: Brine Control System (Central Utility Plant)

3b. Project Cost Estimate: \$15,000

3c. Source of Estimate: Siemens Industry, Inc.

3d. If previous funding from this source was awarded, explain how this request differs? N/A

4. Project Description

(Completed in as much detail as possible.)

- a. The scope of the work to be accomplished is a detailed description of project activities.
- b. The benefit statement describes the advantages of the project as relates to the selected project category.
- c. The location of the project includes the name of the building, department, and/or specific location of where the project will be conducted on campus.
- d. List any departments you anticipate to be involved. Were any departments consulted in preparation of this request? Who? A listing may be attached to this form when submitted.
- e. Provide specific information on anticipated student involvement or benefit.
- f. Provide information for anticipated future operating and/or maintenance requirements occurring as a result of the proposed project.
- g. Provide any additional comments or information that may be pertinent to approval of the project funding request.

4a. Scope: Work to be accomplished

To purchase and install Brine control system for the brine tanks location in the central plant. This project will conserve water by maintaining proper water levels in the brine tanks.

4b. Scope: Benefit Statement

Current, MTSU has two brine tanks located in the Central Plant, when the tanks overflow, treated water will be wasted. Also, the low water levels in the tanks will not allow the pumps to deliver an adequate amount of soft water to the boiler. This new system will correct this problem. This project will conserve water by maintaining proper water levels in the brine tanks.
