Wednesday, March 2

**Embracing and Advancing Diversity, Equity, Inclusion, and Respect (DEIR) in the Chemical Sciences**

6 p.m. • Science Building, Room 1003

Nationally known forensic chemist Kelly Elkins will speak about using modern techniques to analyze DNA extracted from historic bone and teeth. The results of next generation sequencing demonstrate the potential not only to obtain short tandem repeat (STR) profiles from historic bone and teeth, but also to retrieve phenotypic and biogeographical ancestry information and augment the bioarchaeological analysis.

Dr. Jacqueline Walters
Women's Advocate, Award-Winning OB-GYN

Monday, February 28
7:00 p.m.
Student Union Building

Dr. Jackie, as she is affectionately known, merges traditional medicine with a cutting-edge approach that focuses on the mind, body, and spirit. She has incorporated a Women's Wellness Program and a “Fit Is the New It” initiative into her Atlanta practice to promote healthy living and awareness of heart disease among women.

A two-time breast cancer survivor, Walters has turned her pain into a passion for nurturing the emotional and physical needs of women and men diagnosed with breast cancer. In 2013, she founded the 50 Shades of Pink Foundation, a nonprofit whose mission is to treat the inner and outer beauty of survivors.

As one of the stars of Bravo’s hit reality series Married to Medicine, Walters has earned legions of fans for her distinct style, sense of reason, and sincere compassion while raising awareness on important health issues. She also uses her influence to champion self-love and empowerment as an ambassador of ME Period, a movement that inspires women to see the greatness in themselves.

Co-sponsored with the Distinguished Lecture Committee and the Intercultural and Diversity Affairs Center
