

MONOHAN

Next to Normal

Welcome Home, Monohan Family!

Monohan is home to two Living Learning Communities (Music at Middle and Diverse World, Diverse Arts). Many students who live in the building either actively participate or appreciate the different disciplines of the arts. It is a good way to make connections.

COVID has impacted many of the functions and activities that Monohan residents normally participate in, such as open mic nights, trips to TPAC, and Monoroo! We are in the process of getting “back to better” which will feel like “Next to Normal”. We have learned lots of ways to do things during the past year to help us improve for the future.

As we prepare for a new year, we are preparing for a new Faculty-in-Residence from the music department. This is one of the music professors who has elected to live in Monohan with us to help promote our Living Learning Community. Angela DeBoer has stepped down from this position, but we are now welcoming Dr. David Cyzak in this role. He has a lot of great ideas to help enhance the music and art community within Monohan.

Be sure to actively check your email for all the exciting opportunities to connect with staff, other residents, and the rest of the MTSU campus. We look forward to connecting with you in this “Next to Normal” year.
