

MT Engage Major Pathways

MT Engage Major Pathways provide students with opportunities to practice and apply integrative thinking and reflection skills across multiple courses in their major. A department can use the MT Engage Major Pathway to advance its own goals for its curriculum, pedagogy, student learning goals and objectives, and assessment.

The expected components of a Major Pathway include:

- a minimum of four MT Engage-designated courses, of which at least two must be at the upper-division level;
- a minimum of one signature assignment from each MT Engage-designated course in the major that faculty assess using the MT Engage Integrative Thinking and Reflection rubric and students save in the D2L ePortfolio;
- adaptation of the MT Engage ePortfolio presentation template to the needs and goals of the major;
- use of MT Engage concepts as appropriate for departmental assessment or accreditation needs.

MT Engage Major Pathways completed

- Geosciences
- Textiles, Merchandising, and Design
- Community and Public Health

MT Engage Major Pathways in development

- Communication Studies
- Marketing and Business Education
- Psychology
- Social Work
