## **BOREN SCHOLARSHIP**

Boren Scholarships provide unique funding opportunities for U.S. undergraduate students to study less commonly taught languages in world regions critical to U.S. interests. The countries of Western Europe, Canada, Australia, and New Zealand are excluded.

Maximum scholarship awards are:

- \$8,000 for a summer program (special initiative for STEM students only; 8 weeks minimum)
- \$10,000 for a semester
- \$20,000 for a full academic year

There are great Boren options in Asia and Africa that have a summer language component followed by placement in a study abroad fall program.

The program focuses on geographic areas, languages, and fields of study deemed critical to U.S. national security. It draws on a broad definition of national security, recognizing that the scope of national security has expanded to include not only the traditional concerns of protecting and promoting American well-being, but also the challenges of global society, including: sustainable development, environmental degradation, global disease and hunger, population growth and migration, and economic competitiveness.

Boren Scholarships are awarded with [preference](#) for countries, languages, and fields of study critical to U.S. national security. Preference is also given to students who will study abroad for longer periods of time, and who are highly motivated by the opportunity to work in the federal government.
