SGA Resolution 2-20-S

A Resolution to Upgrade Parking Garage Technology

Whereas: The parking garages at Middle Tennessee State University have T2 sensors that count cars as they enter and exit.

Whereas: Other schools use this same technology, but it is upgraded to inform students of the number of available spots on a mobile app.

Whereas: Students, unaware of how many spots are available, are often unable to enter the garages due to them reaching capacity.

THEREFORE, LET IT BE RESOLVED BY THE 82ND CONGRESS OF THE STUDENT GOVERNMENT ASSOCIATION AT MIDDLE TENNESSEE STATE UNIVERSITY THAT:

Section 1: Parking garage technology will be upgraded to share the number of available spots on the MT mobile app at all times.

Section 2: This bill shall take effect immediately upon favorable passage.
