How to Register for Classes in SSB9 Quick Guide

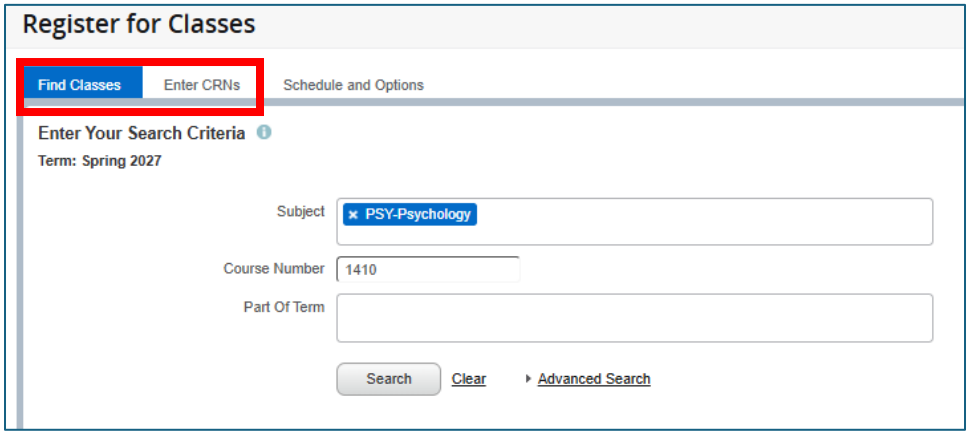

In PipelineMT under the **Registration and Student Records** menu, select the "**Register for Classes**" icon or link.

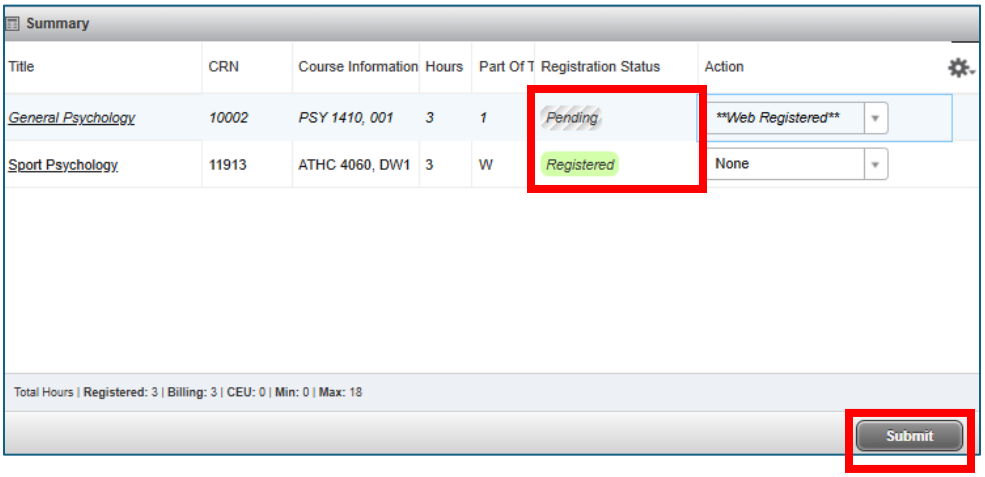

A new tab will open with a registration menu. Click the **Register for Classes** link here and then select the term.

Search for classes to add or enter CRNs directly on the 2nd tab. You can search by course subject, number, or part of term, and there is an advanced search option with more ways to narrow down the class options available.

Once you add a course or a CRN, it will go to your Summary box, which is like a shopping cart. Your transaction is not complete until you hit "**Submit**" in the summary and the class goes from **Pending** to **Registered**.

Visit mtsu.edu/ssb for more instructions on how to navigate PipelineMT
