

Aging Studies Program

Ron Aday, Director
Alumni Memorial Gym 123

The interdisciplinary minor in Aging Studies is designed to meet the needs of students interested in pursuing a career working with or for the older adult population. The minor provides students the opportunity to examine the biological, psychological, sociological, and cultural perspectives which influence the status of the aging individual in society. Students who complete the Aging Studies minor will be exposed to the basic social policies and personal skills required for working effectively with older persons.

Program Requirements

The minor requires the successful completion of 18 semester hours. All students are required to take A S 2600. The remaining 15 hours may be selected from various departmental courses that have been approved. The general requirement for an interdisciplinary minor is that students may not take more than six hours from a single department. To strengthen research or applied skills, students are encouraged to complete either A S 4800 or A S 4900.
