

SGA Resolution No. 3-04-S

A resolution to open the traffic control arm located on Old Main at certain times.

Whereas: There is no access to the interior of campus via the entrance on East Main Street.

Whereas: In order to reach the campus interior, one must drive all the way around campus

Whereas: There is no need for a traffic control arm to regulate traffic at non-peak times

Whereas: The amount of security the traffic control arm offers to the buildings in its vicinity is negligible.

Therefore, let it be resolved by the 66th Congress of the Student Government Association of Middle Tennessee State University that:

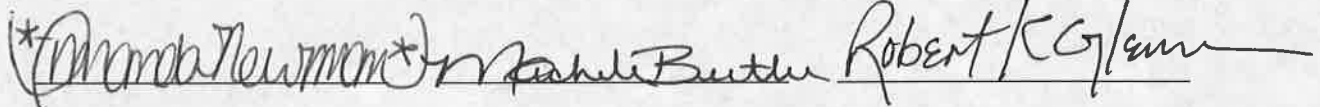

Section 1. Students and faculty should be able to easily access the campus interior without having to drive around campus.

Section 2. Between the hours of 7 PM and 6 AM on Monday through Thursday, the traffic control arm shall be raised to allow traffic to flow freely through Old Main circle.

Section 3. On weekends, the traffic control arm shall be raised beginning Friday at 7 PM and remain open until Monday at 6 AM.

Section 4. During special events on campus that these hours be modified or suspended by MTSU Public Safety as they see fit.
